

This course lived up to my expectations.	The topics covered in this course were relevant to me.	The pace of the sessions was appropriate.	The resources (course website, BBB room, recordings, slides decks, etc) were easy to navigate and use.	The readings felt relevant to my own teaching practice.	This course was a valuable learning experience.	Please tell us about something you learned or appreciated about the class.	Is there a way this course could be improved or an additional topic we could cover?	Is there anything else you want us to know?
Strongly Agree	Strongly Agree	Strongly Agree	Strongly Agree	Strongly Agree	Strongly Agree	I really enjoyed all of the new tools I have learned. I am sure to use them in the classroom.		I really liked being able to customize my portfolio to tools that fit within my teaching practice.
Agree	Neither Agree nor Disagree	Agree	Agree	Disagree	Agree	How someone can incorporate the use of technology in the trades classroom with the use of a website and tools such as H5P to test student skills and knowledge.	Not that I can think of. Perhaps more options for trades pros and how they can use what is taught when they are in a hands-on environment.	Thank you for offering this course!
Strongly Agree	Strongly Agree	Strongly Agree	Strongly Agree	Strongly Agree	Strongly Agree	There were a number of useful tools and discussions. The course made it possible for me to create a website... I had no idea how to accomplish this before taking the course.		I think that teaching any practical skill (like navigating a software) online is extremely difficult. I appreciate the effective ways that the instructors handled this instruction. It gave me some ideas for improving my own online delivery.
Strongly Agree	Strongly Agree	Strongly Agree	Strongly Agree	Strongly Agree	Strongly Agree	I loved taking this course from Brenna and Jamie! The course supported my current use of technology in education. It has also provided me with a polished site with which to display my pedagogy in general. I appreciated learning how to construct an eportfolio in Wordpress. I also appreciated learning how to construct H5P interactive exercises for my students.	I think what would work well in a F2F format is to have workshop/tutorial sessions. For example, we work on constructing a particular H5P or twine exercise on site. This would provide some more hands-on learning.	Keep up the amazing work and support system you've created for us Jamie and Brenna! We couldn't do it without you. And thanks for NEVER making me feel 'stupid' for not know how to do something...right from a basic thing in moodle to making H5P games and constructing a Wordpress site!
Agree	Strongly Agree	Strongly Agree	Agree	Strongly Agree	Strongly Agree	The vast array of resources available.	Easier access and explanation of resources outside of class. Perhaps a glossary with links.	An enjoyable and informative experience.
Agree	Agree	Strongly Agree	Agree	Neither Agree nor Disagree	Agree	I always appreciate kind instructors, so that was nice. I appreciated how much work teachers put into the course to only get a little bit of content output.	I would have loved more examples of how trades instructors are using technology in their courses. I can see many of the concepts working for english or science students but had troubles grasping at the trades aspect where students don't use computers much.	You two were wonderful. I think you teach valuable content in a loving way, which is basically being the example of how I would like to be viewed as a teacher, so modelling what that looks like. Thank you.
Strongly Agree	Agree	Strongly Agree	Strongly Agree	Neither Agree nor Disagree	Strongly Agree	I learned even the professionals struggle with glitches in software. It made me feel better about my own experiences	No, I enjoyed it and felt the pace was just right. I wasn't sure if doing this course and teaching fulltime would be a good idea but it worked out well and I loved the online format. It saved everyone, instructors included, a lot of travel time and being at home made it more comfortable.	I liked the 2 instructor format, it worked well.
